Operators

Operators are symbols or keywords in programming languages that perform operations on operands.

1. **Arithmetic Operators:**

Addition (+)   Subtraction (-)

Multiplication(*)   Division (/)

Modulo (%)   Exponentiation (**)

2. Assignment Operators:

Assignment (=)   Addition assignment (+=)

Subtraction assignment (-=)   Multiplication assignment (*=)

Division assignment (/=)   Modulus assignment (%=)

3. Comparison Operators:

==   ===   !=   !==   >   <   >=   <=

4. Logical Operators:

&& (AND) || (OR)   ! (NOT)

5. Increment/Decrement Operators:

++ (Increment)   -- (Decrement)
